

<b>Course Description</b>					
<b>Name</b>	<b>Code</b>	<b>Semester</b>	<b>T+A Hour</b>	<b>Credit</b>	<b>ECTS</b>
AIR TRANSPORTATION and CUSTOMS OPERATIONS	HVY3112132	Fall Semester	3+0	3	4
<b>Prerequisites Courses</b>					
<b>Recommended Elective Courses</b>					
<b>Language of Instruction</b>	Turkish				
<b>Course Level</b>	First Cycle (Bachelor's Degree)				
<b>Course Type</b>	Required				
<b>Course Coordinator</b>	Assist.Prof. Fatih KARAMAN				
<b>Name of Lecturer(s)</b>	Assist.Prof. Fatih KARAMAN				
<b>Assistant(s)</b>					
<b>Aim</b>	Fast, safe and secure transportation service between the producing and consuming regions of the world is provided by air cargo transportation without interruption.				
<b>Course Content</b>	This course contains; Introduction to Airline Transport and Concepts,The Place and Importance of Airline Transportation in the Sector,Passenger and Cargo Transport,Strategic Planning in Airline Transportation,Airline Transport Economics,National and International Organizations in Aviation,Service Quality and Passenger Rights in Airline Transportation,The Future of Airline Transport,Basic Concepts of Customs Legislation,Origin of Goods and Customs Value,Customs Tariffs, Tariff Positions of Goods, Calculation of Tariffs and Exemption Conditions,The Concept of Regime, General Description of Customs Regimes,Declaration and inspection, liability, penalties and objection remedies in customs,Representation Authority at Customs and Customs Consultancy.				
<b>Course Learning Outcomes</b>			<b>Teaching Methods</b>	<b>Assessment Methods</b>	
1 - Will have general knowledge about transportation systems.			16, 9	A	
1.1 - Explains different types of transportation systems.			16, 9	A	
1.2 - Knows the significance of air cargo transportation by comparing it with other transportation systems.			16, 9	A	
2 - Will be able to understand the cargo flow in air transportation from the origin to the destination.			16, 9	A	
2.1 - Describes different cargo operations carried by passenger and cargo aircraft.			16, 9	A	
2.2 - Explains the importance of air express sector.			16, 9	A	
3 - Will be able to define the importance of air cargo transportation, which plays a role in aviation and logistics processes.			16, 9	A	
3.1 - Defines the relationship between logistics and air cargo.			16, 9	A	
3.2 - Explains the strengths and weaknesses of air cargo.			16, 9	A	
4 - Will be able to explain the basic principles and concepts of customs legislation.			16, 9	A	
4.1 - Knows the basic customs regimes.			16, 9	A	
4.2 - Knows export, import and transit customs clearance procedures and operations.			16, 9	A	
5 - Will be able to understand the importance of customs operations in air cargo transportation.			16, 9	A	
5.1 - Explains electronic customs procedures.			16, 9	A	
5.2 - Knows the risk management, facilitation and control functions of customs.			16, 9	A	
<b>Teaching Methods</b>	16: Question - Answer Technique, 9: Lecture Method				
<b>Assessment Methods</b>	A: Traditional Written Exam				
<b>Lecture Schedule</b>					
<b>Sequence</b>	<b>Topics</b>	<b>Preliminary Preparation</b>			
1	Introduction to Airline Transport and Concepts				
2	The Place and Importance of Airline Transportation in the Sector				
3	Passenger and Cargo Transport				
4	Strategic Planning in Airline Transportation				
5	Airline Transport Economics				
6	National and International Organizations in Aviation				
7	Service Quality and Passenger Rights in Airline Transportation				
8	The Future of Airline Transport				
9	Basic Concepts of Customs Legislation				
10	Origin of Goods and Customs Value				
11	Customs Tariffs, Tariff Positions of Goods, Calculation of Tariffs and Exemption Conditions				
12	The Concept of Regime, General Description of Customs Regimes				
13	Declaration and inspection, liability, penalties and objection remedies in customs				
14	Representation Authority at Customs and Customs Consultancy				
<b>Evaluation Methods</b>		<b>Weight(%)</b>			
Midterm Exam		40			
General Exam		60
