

International School of Medicine / Medicine (English)

2023 - 2024 Academic Year

UROLOGY

Syllabus

Course Description					
Name	Code	Semester	T+A Hour	Credit	ECTS
UROLOGY	ISM5014624	Yearly	19+37	0	5
Prerequisites Courses					
Recommended Elective Courses					
Language of Instruction	English				
Course Level	First Cycle (Bachelor's Degree)				
Course Type	Practice				
Course Coordinator	Assist.Prof. Gökhan ÇALIK				
Name of Lecturer(s)	Prof.Dr. Johan Joseph Maria Catharina Hubertus DELAROSSETTE, Prof.Dr. Maria Del Pilar LAGUNA PES, Assist.Prof. Gökhan ÇALIK				
Assistant(s)					
Aim	Knowing the urological diseases that are common in the adult and pediatric patient group and causing significant morbidity and mortality, able to diagnose and treat these diseases in parallel with the education level of National Core Education Program during the primary health care service, and perform emergency intervention, To train physicians who can direct them to a higher level institution when necessary, who can provide advice on prevention methods and risk factors, who follow the current literature, think scientifically and act in accordance with ethical rules at every stage.				
Course Content	This course contains; Urogenital Traumas, Imaging Methods in Urology, Urological Instrumentation Endourology, Symptomatology and Clinical Evaluation, Urological Emergencies, İşeme Fizyolojisi ve İnkontinans , Urinary System Infections (Non-Specific Infections), Urinary System Infections (Specific Infections), Urinary System Congenital Anomalies, Adrenal Gland Diseases, Undescended Testis and Other Scrotum Coverage Diseases, Vesicoureteral Reflux, Kidney Tumors, Erectile Function/Dysfunction, Benign Prostatic Hyperplasia, Bladder Tumors / Upper Urinary System Urothelial Tumors, Male Infertility and Its Treatment, Urinary System Stone Disease (Etiopathogenesis), Urinary System Stone Disease (Surgical Treatment and Medical Treatment), Prostate Carcinoma (Etiology, Pathogenesis, Diagnosis), Prostate Carcinoma (Etiology, Pathogenesis, Diagnosis), What Primary Care Physicians Need to Know in Urological Diagnosis and Treatment (General Summary), Testicular Tumors, Urogenital System Radiology.				
Course Learning Outcomes			Teaching Methods	Assessment Methods	
Defines and teaches urological diseases that are common in adult and pediatric patients and cause significant morbidity and mortality.			10, 16, 9	A, D	
Teaching Methods	10: Discussion Method, 16: Question - Answer Technique, 9: Lecture Method				
Assessment Methods	A: Traditional Written Exam, D: Oral Exam				
Lecture Schedule					
Sequence	Topics	Preliminary Preparation			
0	Urogenital Traumas				
0	Imaging Methods in Urology				
0	Urological Instrumentation Endourology				
0	Symptomatology and Clinical Evaluation				
0	Urological Emergencies				
0	İşeme Fizyolojisi ve İnkontinans				
0	Urinary System Infections (Non-Specific Infections)				
0	Urinary System Infections (Specific Infections)				
0	Urinary System Congenital Anomalies				
0	Adrenal Gland Diseases				
0	Undescended Testis and Other Scrotum Coverage Diseases				
0	Vesicoureteral Reflux				
0	Kidney Tumors				
0	Erectile Function/Dysfunction				
0	Benign Prostatic Hyperplasia				
0	Bladder Tumors / Upper Urinary System Urothelial Tumors				
0	Male Infertility and Its Treatment				
0	Urinary System Stone Disease (Etiopathogenesis)				
0	Urinary System Stone Disease (Surgical Treatment and Medical Treatment)				
0	Prostate Carcinoma (Etiology, Pathogenesis, Diagnosis)				
0	Prostate Carcinoma (Etiology, Pathogenesis, Diagnosis)				
0	What Primary Care Physicians Need to Know in Urological Diagnosis and Treatment (General Summary)				
0	Testicular Tumors				
0	Urogenital System Radiology				
Evaluation Methods		Weight(%)			
Midterm Exam		40			
General Exam		60
