

School of Fine Arts Design and Architecture / Interior Architecture and Environmental Design

2023 - 2024 Academic Year

DETAILING in INTERIOR SPACE

Syllabus

Course Description					
Name	Code	Semester	T+A Hour	Credit	ECTS
DETAILING in INTERIOR SPACE	ICT3158940	Fall Semester	2+2	3	4
Prerequisites Courses	YAPIM TEKNOLOJİSİ II				
Recommended Elective Courses					
Language of Instruction	Turkish				
Course Level	First Cycle (Bachelor's Degree)				
Course Type	Required				
Course Coordinator	Assist.Prof. Pelin KARAÇAR				
Name of Lecturer(s)	Assist.Prof. Kevser COŞKUN, Assist.Prof. Tolga KILIÇ, Lect. Semih AKŞEKER, Lect. Selin KESKİNEL				
Assistant(s)					
Aim	In this course, it is aimed to introduce to the students traditional and state-of-the-art systems of ceiling, wall, and floor elements which form the interior environment. Additionally the relations among these elements and the other building components will be examined in all directions.				
Course Content	This course contains; Course definition and giving preliminary information, Introduction to door window and modular construction elements, Windows, types and sample applications, Doors, types and sample applications, Modular systems and applications in interior space, Modular systems and applications in interior space, Mid-term Exam, Flooring systems, types and substructures in interior space, Wall systems, types and substructures in interior space, Ceiling systems, types and substructures in interior space, Detailed application project, Detailed application project, Detailed application project, Detailed application project.				
Course Learning Outcomes			Teaching Methods	Assessment Methods	
It has knowledge about building components and sub-systems which constitute the interior and its surroundings.			10, 18, 37, 9	E, F	
It has knowledge about door, window and modular systems and their details.			10, 18, 37, 9	E, F	
It develops and proposes a system for the joining details of all building elements forming the interior space.			12, 14, 18, 19, 9	F	
Teaching Methods	10: Discussion Method, 12: Problem Solving Method, 14: Self Study Method, 18: Micro Teaching Technique, 19: Brainstorming Technique, 37: Computer-Internet Supported Instruction, 9: Lecture Method				
Assessment Methods	E: Homework, F: Project Task				
Lecture Schedule					
Sequence	Topics	Preliminary Preparation			
1	Course definition and giving preliminary information				
2	Introduction to door window and modular construction elements				
3	Windows, types and sample applications				
4	Doors, types and sample applications				
5	Modular systems and applications in interior space				
6	Modular systems and applications in interior space				
7	Mid-term Exam				
8	Flooring systems, types and substructures in interior space				
9	Wall systems, types and substructures in interior space				
10	Ceiling systems, types and substructures in interior space				
11	Detailed application project				
12	Detailed application project				
13	Detailed application project				
14	Detailed application project				
Evaluation Methods		Weight(%)			
Midterm Exam		50			
General Exam		50			
Resources					
To be distributed by the lecturer.1. Detail Series Interior + Architecture, Archiworld Co., Ltd. 2. Binglei, C., 2014. Materials and Interior Environments, John Wiley and Sons, Inc., Canada. 3. Francis D.K.CHING , Building Construction Illustrated, Cassandra ADAMS
