

**School of Fine Arts Design and Architecture / Architecture**

**2023 - 2024 Academic Year**

**DIGITAL DESIGN TOOLS PRACTICE II**

**Syllabus**

<b>Course Description</b>					
<b>Name</b>	<b>Code</b>	<b>Semester</b>	<b>T+A Hour</b>	<b>Credit</b>	<b>ECTS</b>
DIGITAL DESIGN TOOLS PRACTICE II	MIM2210321	Spring Semester	0+2	1	2
<b>Prerequisites Courses</b>	DİJİTAL TASARIM ARAÇLARI UYGULAMA I				
<b>Recommended Elective Courses</b>					
<b>Language of Instruction</b>	Turkish				
<b>Course Level</b>	First Cycle (Bachelor's Degree)				
<b>Course Type</b>	Elective				
<b>Course Coordinator</b>	Assist.Prof. Mustafa Adil KASAPSEÇKİN				
<b>Name of Lecturer(s)</b>	Assist.Prof. Mustafa Adil KASAPSEÇKİN, Lect. Fatma Tuğba VERDİL				
<b>Assistant(s)</b>	Res. Asst. Nursena Coşkun				
<b>Aim</b>	The aim of this course is to provide necessary practical knowledge for the realisation and presentation of design in the digital environment				
<b>Course Content</b>	This course contains; The emergence, definition and development process of BIM concept The construction industry needs BIM? Why use BIM? What is BIM?, How does BIM change the construction industry?,Basic features of BIM technology Overview of BIM-based software, basic concepts related to BIM, ND BIM, conflict control, interoperability, virtual reality, energy simulations,Introduction to BIM Autodesk Revit interface and introduction of the program,Parametric modeling concept, "family" concept in Revit Modeling and detailing of architectural building elements 1: Wall, door, window,,Modeling and detailing of architectural building elements 2: Stairs, stair parts (riser, step, landing), upholstery,,Modeling and detailing of architectural building elements 3: Roofs, ceilings, ramps,Modeling and detailing of architectural building elements 3: Roofs, ceilings, ramps,Section box, sheet creation, shop drawing creation, detail drawing,"BIM examples from the world" group presentations,"BIM examples from the world" group presentations,Material selection and assignment to building elements, use of 2D, 3D camera,Term project evaluation 1,Parametric and original modeling technique using "Revit family",Term project evaluation 2.				
<b>Course Learning Outcomes</b>			<b>Teaching Methods</b>	<b>Assessment Methods</b>	
Understanding of design and visual presentation techniques in digital environment			16, 37, 8, 9	E, F	
Gaining digital representation skills in architecture			16, 37, 8, 9	E, F	
Gaining the ability for simulating the estimated behaviour of natural and artificial environmental systems			16, 37, 8, 9	E, F	
<b>Teaching Methods</b>	16: Question - Answer Technique, 37: Computer-Internet Supported Instruction, 8: Flipped Classroom Learning, 9: Lecture Method				
<b>Assessment Methods</b>	E: Homework, F: Project Task				
<b>Lecture Schedule</b>					
<b>Sequenc e</b>	<b>Topics</b>	<b>Preliminary Preparation</b>			
1	The emergence, definition and development process of BIM concept The construction industry needs BIM? Why use BIM? What is BIM?, How does BIM change the construction industry?				
2	Basic features of BIM technology Overview of BIM-based software, basic concepts related to BIM, ND BIM, conflict control, interoperability, virtual reality, energy simulations				
3	Introduction to BIM Autodesk Revit interface and introduction of the program				
4	Parametric modeling concept, "family" concept in Revit Modeling and detailing of architectural building elements 1: Wall, door, window,				
5	Modeling and detailing of architectural building elements 2: Stairs, stair parts (riser, step, landing), upholstery,				
6	Modeling and detailing of architectural building elements 3: Roofs, ceilings, ramps				
7	Modeling and detailing of architectural building elements 3: Roofs, ceilings, ramps				
8	Section box, sheet creation, shop drawing creation, detail drawing				
9	"BIM examples from the world" group presentations				
10	"BIM examples from the world" group presentations				
11	Material selection and assignment to building elements, use of 2D, 3D camera				
12	Term project evaluation 1				
13	Parametric and original modeling technique using "Revit family"				
14	Term project evaluation 2				
<b>Evaluation Methods</b>		<b>Weight(%)</b>			
Midterm Exam		50			
General Exam		50
