

School of Engineering and Natural Sciences / Industrial Engineering (English)

2023 - 2024 Academic Year

MANUFACTURING PROCEDURES

Syllabus

Course Description					
Name	Code	Semester	T+A Hour	Credit	ECTS
MANUFACTURING PROCEDURES	IND2133910	Fall Semester	3+0	3	6
Prerequisites Courses					
Recommended Elective Courses					
Language of Instruction	English				
Course Level	First Cycle (Bachelor's Degree)				
Course Type	Required				
Course Coordinator	Prof.Dr. Talip ALP				
Name of Lecturer(s)	Prof.Dr. Talip ALP				
Assistant(s)					
Aim	The aims and objectives of this course is to impart to The would be industrial engineers the basic principles and solient features of modern manufacturing technologies				
Course Content	This course contains; 1. Introduction to Materials and Manufacturing Processes,2. Properties of Engineering MAterials,3. Metals and Alloys,4. Equilibrium Phase Diagrams,5. Heat Treatment of Steel (and selected alloys),6. Non-Ferrous Metals and Alloys,7. Iron and Steel,8. Non-Metallic Materials,9. Materials Selection,10. Metal Casting and Foundry,11. Bulk Forming Processes,12. Powder Metallurgy,13. Welding Processes,14. Surface Engineering.				
Course Learning Outcomes			Teaching Methods	Assessment Methods	
1. Will absorb the theories and applications of various industrial production processes			12, 14, 16, 9	A, D	
2. Will be educated about the main inputs and manufactured products involved in different manufacturing processes			12, 14, 9	A, D	
3. Understand the methods of designing the properties of materials using heat treatment, mechanical processes and thermo-mechanical processes			12, 14, 16, 19, 9	A, D, E	
4. Will be able to identify the most suitable manufacturing process among different options			13, 16, 19, 9	A, D	
5. Understand the surface hardening methods in steels.			13, 16, 19, 9	A, D	
Teaching Methods	12: Problem Solving Method, 13: Case Study Method, 14: Self Study Method, 16: Question - Answer Technique, 19: Brainstorming Technique, 9: Lecture Method				
Assessment Methods	A: Traditional Written Exam, D: Oral Exam, E: Homework				
Lecture Schedule					
Sequenc e	Topics	Preliminary Preparation			
1	1. Introduction to Materials and Manufacturing Processes				
2	2. Properties of Engineering MAterials				
3	3. Metals and Alloys				
4	4. Equilibrium Phase Diagrams				
5	5. Heat Treatment of Steel (and selected alloys)				
6	6. Non-Ferrous Metals and Alloys				
7	7. Iron and Steel				
8	8. Non-Metallic Materials				
9	9. Materials Selection				
10	10. Metal Casting and Foundry				
11	11. Bulk Forming Processes				
12	12. Powder Metallurgy				
13	13. Welding Processes				
14	14. Surface Engineering				
Evaluation Methods		Weight(%)			
Midterm Exam		30			
General Exam		70
