Explains the exercise overview			8, 9	A	
Describes different types of exercise			16, 8, 9	A	
Discusses exercises applied in different disease states			16, 8, 9	A	
<b>Teaching Methods</b>	16: Question - Answer Technique, 8: Flipped Classroom Learning, 9: Lecture Method				
<b>Assessment Methods</b>	A: Traditional Written Exam				
<b>Lecture Schedule</b>					
<b>Sequence</b>	<b>Topics</b>	<b>Preliminary Preparation</b>			
1	Williams-Mc Kenzie Exercises	Mebis notes			
2	Posture Exercises	Mebis notes			
3	Physical Activity and Healthy Living	Mebis notes			
4	Aqua therapy	Mebis notes			
5	Obesity and rehabilitation	Mebis notes			
6	Physiological changes in urogynecology	Mebis notes			
7	Orthopedic Diseases	Mebis notes			
8	Orthotics and rehabilitation	Mebis notes			
9	Arthroplasty and Rehabilitation	Mebis notes			
10	Stroke and rehabilitation	Mebis notes			
11	Spinal Cord Injuries and Rehabilitation	Mebis notes			
12	Peripheral Nerve Injuries	Mebis notes			
13	Peripheral Nerve Injuries and rehabilitation	Mebis notes			
14	General Repetition	Mebis notes			
<b>Evaluation Methods</b>		<b>Weight(%)</b>			
Midterm Exam		40			
General Exam		60
